PRESS RELEASE

Padtec provides 800 Gb/s transponders for AdyINet to modernize its network

Campinas, São Paulo, July 29th, 2022 - PADTEC HOLDING S.A. (B3: PDTC3) ("Padtec" or "Company") announces that AdyINet, a telecommunications service provider from the state of Rio Grande do Sul, is investing in a high-capacity communication network interconnecting the capitals of São Paulo/SP, Curitiba/PR, Florianópolis/SC and Porto Alegre/RS to key cities in the state of Rio Grande do Sul. Therefore, AdyINet has adopted Padtec's 800 Gbps transponder product line (up to 400 Gbps per optical channel), aiming to offer its customers a high quality experience.

Based in Nova Prata (Rio Grande do Sul), AdyINet currently serves more than 50,000 residential, corporate and wholesale customers. The decision to modernize its network infrastructure is part of the company's strategy to meet the growing demands for bandwidth and new services in the regions where it operates.

In line with the latest technology trends in this market, the 800 Gbps transponder product line of Padtec's LightPad i6400G platform combines high data transmission rates with lower cost per transmitted bit.

Padtec is committed to provide solutions that, in addition to being innovative and state-of-the-art technology, support the development of its customers' business, contributing to the growth of their revenues and the satisfaction of the users of their services.

About Padtec (www.padtec.com.br)

Padtec is a global provider of flexible and high-capacity optical transport solutions based on DWDM technology. Padtec offers an extensive product portfolio for corporate access, DCI, metropolitan and regional networks and multi-terabit long-distance networks, which meets the end-to-end demands - in transport, optical amplification and route protection - of operators, integrators, carrier of carriers, utilities and service providers. Padtec's service unit is involved in the deployment, operation and maintenance of systems and in optical network management. With a strong focus on research and development, Padtec's, pioneering technology spans long distances and challenges boundaries to connect the world intelligently.
