AUTHORIZED CAPITAL PUBLICLY HELD COMPANY

MARKET ANNOUNCEMENT

Padtec completes the acquisition of LEV Brasil

Campinas, July 30, 2026 - PADTEC HOLDING S.A. (B3: PDTC3) ("Company" or "Padtec"), further to the Material Fact disclosed on June 5, 2026, informs its shareholders and the market that, on this date, after approval of the transaction at the Extraordinary General Meeting held on July 8, 2026 and once the other conditions precedent set forth in the transaction documents had been verified, the acquisition of an equity interest corresponding to 85% of the share capital of LEV Brasil - Estudos e Projetos em Geociências Aplicadas Ltda. and Coral Esperançoso Unipessoal Ltda. (jointly "LEV" or "LEV Brasil") was completed for R$5.6 million ("Transaction").

Founded in 2016, LEV Brasil has experience in multidisciplinary projects involving planning, environmental licensing, geotechnical and geophysical studies, coastal and subsea engineering, construction supervision, installation, monitoring and protection of cables and pipelines in marine and coastal environments.

Upon completion of the Transaction, LEV Brasil officially becomes part of Padtec Marine Networks (PMN), Padtec's new business unit dedicated to the development and deployment of subsea and inland waterway infrastructure projects. The initiative establishes the Company as a one-stop-shop provider in the Brazilian and Latin American markets, offering solutions ranging from design and integration to deployment and support, amid strong growth in demand for high-capacity connectivity driven by artificial intelligence, data centers and digital services.

PMN is launched as a neutral and collaborative systems integrator capable of delivering complete projects through partner suppliers. Its goal is to simplify the journey of companies and governments toward underwater connectivity, serving telecom operators, digital service providers, data centers, hyperscalers, utilities, energy companies and critical infrastructure protection initiatives. With this new unit, Padtec re-enters the submarine optical systems market, where it previously participated in projects such as Cabo Júnior, which connected Santos to Rio de Janeiro in 2016.

Padtec will keep its shareholders and the market informed of any relevant developments related to the integration of LEV Brasil and Padtec Marine Networks.

Further information about the Transaction is available on the Investor Relations page of the Company's website (www.padtec.com.br/investor/padtec-holding/), as well as on the websites of the Brazilian Securities and Exchange Commission (CVM) (www.cvm.gov.br) and B3 S.A. – Brasil, Bolsa, Balcão (B3) (www.b3.com.br).
